

Active Ceramide 3 liposome

Product Name

Active Ceramide 3 liposome

Product Overview

This formulation contains liposomes made of phospholipids from soy lecithin and ceramide 3. The liposomal delivery system protects the active ingredient making it reach the target cells more efficiently. The major cosmetic purpose of ceramides is to support the skin barrier function. Making up at least half of the skin barrier, ceramides play an integral role in skin integrity, protection against the elements, and skin structure. Product designed to be used in cosmetic formulation in the range of 5 to 10 % respect to the final product.

Active Ingredients

Ceramide

Form

Viscous Nano Concentrates

Concentration

6%

Storage

Protected from light at room temperature.
